

Agastache cusickii

Agastache cusickii

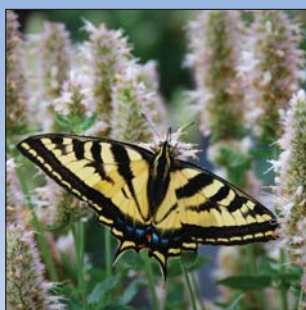

Cusick's hyssop

Agastache cusickii

(uh-GAS-tuh-kee kew-SICK-ee)

Soft-pink, celosia-like feathery flowers bloom all summer long on a compact plant. In nature, found in a wide range of environments including alpine talus slopes and pinyon-juniper woodlands. This is a tough, durable sub-shrub with dense branching and a deep tap root. Selected for longevity and compactness.
