

Eriogonum Jamesii

Eriogonum Jamesii

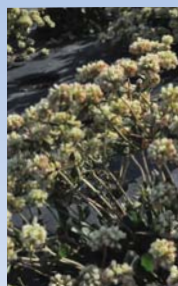

James' buckwheat James' buckwheat

Eriogonum Jamesii

(air-ee-OGG-ih-num jay-MES-ee-eye)

Once in a while nature offers up a gift that can't be ignored. Plants with red foliage fall squarely into that category. This Native Roots James' buckwheat is gifted with fuzzy reddish-gray foliage while

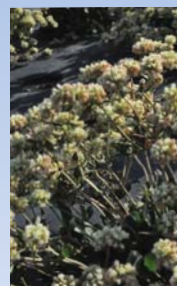

retaining a loose cushion habit and the strengths that make buckwheat's useful in landscaping. To top it off, the cream colored flowers age to a rust about the time fall colors arrive. Stabilizing the red in the leaves was the intent of selections. This plant is a striking addition to any landscape architect's palette.
