

Idaho fescue

Festuca idahoensis

(fes-TOO-kuh eye-duh-ho-EN-sis)

Powder-blue Idaho fescues are common in landscapes nationwide. They're everywhere. Strong testimony that it's a remarkably adaptable plant. Since it's not a one-trick pony, then why just powder blue? To create new interest for a solid performer, ours offers an attractive blue-green bunch of very fine foliage strikingly accented by red flower stems. It's also now a 4 season performer: Overcoming summer dormancy, a problem inherent among cool-season grasses, was part of the selection process, in part to showcase the red stems for a longer period. Use this one everywhere.
