

# Pineleaf Penstemon

## Penstemon pinifolius

(pen-STEEmun pye-nih-FOE-lee-uss)

Penstemon pinifolius offers the type of garden performance that makes it a retail performer. A semi-evergreen mound standing 10 to 15 inches tall that has needle-like leaves and bright red tubular flowers that draw hummingbirds and customers over long distances. It has a bloom period that lasts from late spring through summer, and foliage that retains its green color well past the gardening season. The Native Roots Pineleaf penstemon was selected for a deep red color and heavy bloom. Removing branches with spent blooms encourages re-blooming. Tolerates soils with a high pH without turning yellow.

# Native Roots

Height: 12-18 inches.  
Diameter: 12-18 inches.

Grows in coarse soils, but we have experienced strong performance sandy clay soils.

Suitable for 4-inch and 6-inch pots.

Available in seed and plugs.
